

Other Camping Accessories - Custom-Made Camping Trailer Water Tanks

Other Camping Accessories - Custom-Made Camping Trailer Water Tanks

FEATURES:

- These tanks are custom-made to Camper's Delight's specifications & high standards.
- They are designed to easily fit under most camping trailers.
- You can fit a tank just forward of the axle and / or just rear of the axle.
- Each tank holds a minimum of 95 litres.
- 2 tanks can be fitted under a single trailer and linked up together as a single unit, or left as 2 separate units.
- The tanks are only 160mm high, hence, very little (if any) 4wd clearance is lost - in fact you cannot even see them when they are installed, (unless you get down on your knees!).
- Each tank comes with all the fittings (as shown above).
- If desired, a drainage bung can be purchased separately & installed wherever you like.
- If fitted by Camper's Delight, the water tank is fitted with a checkerplate steel guard across the front.
