Material:

Large tent windows	Clear PVC on top half & mesh on bottom half
All annex windows	Full mesh, with external canvas flap (which can be used as an awning as well)
Roof & walls of tent & annex	All are water proof rip-stop polyester cotton (13oz canvas) - at least 370gsm
Tent floor	Water proof PVC at least 500gsm grid, 100mm up walls
Annex floors	Water proof H/D PE 200gsm & velcroed to walls
Ute back tent travel cover	Tough water-proof PVC cover at least 600gsm is attached to base via sail track system. Cover is 43 cm high for heaps of storage. Uses heavy duty zip, covered by a flap (which is velcroed at front and back), & 3 straps along each side to tighten down cover during travel, reducing ballooning.
All tent & annex U-shape doors	Fully zipped mesh door & fully zipped canvas door
All ropes	5.5mm diameter strong polyester ropes
Fully water proof annex floor velcroed to bottom of annex walls - for extra sealability	Y
Travel cover edge slides into aluminium channel	Y
Very supportive steel frame to surround & strengthen the base	Y
ABS #8 zips on windows & ABS #10 zips on doors	Y
Hot galvanised steel poles (which better prevent the steel from rusting)	Y

Other Standard Specifications:

Roof colour plan (subject to availability)	Dark grey or blue
Colour of walls	All walls are light grey in colour
Self Supporting	Y
Diameter (mm) of steel pole frame	25/22
All curved poles reinforced in corners for extra strength.	Y
Additional canvas on tent roof where horizontal roof bars touch.	Y
Fantastic horizontal roof pole support system	Y
Part of tent pivotal frame has spring loaded push button extendable poles	Y
Tent / sleeping board	Plywood base with a steel frame supporting it
Inner-spring mattress	Approx. 12 cm high
Aluminium ladder with flat foot rungs	Y
3 access doors - 1 through tent wall & other 2 at either side	Y
4 storage pockets in tent - 1 at each end of the bed & 2 on end wall	Y
Seam tape on the tent roof & annex roof	Y

Ute Back Tents - Specifications & Pricing
